Project Name: Recipe Management

App Name: Recipe

Objective:

Build a Django app where users can **create, read, update, and delete recipes**, with access control via **login/logout/register** functionality.

Authentication Features:

- User Registration
- Login
- Logout
- Only logged-in users can:
    - Add new recipe
    - Edit their uploaded recipe
    - Delete their uploaded recipe

Model: recipe

- name
- ingredients
- instructions
- Recipe Image
- creator
-description
- created at

Required Features:

 Use Django's built-in User model for authentication

 Admin panel to manage recipes

 CRUD Views:

- Create Recipe

- List Recipes (public)
- View Single Recipe (public)
- Edit & Delete (for owner only)
- Use Bootstrap cards to display recipes
- Add a thumbnail-style card design to display each Recipe
